**“Recycling should be compulsory for everyone. What is your opinion?” Please declare your ideas through an OPINION ESSAY.**

**SAMPLE ESSAY**

*Recycling Should Be Mandatory for Everyone*

*In today's world, environmental problems are becoming more serious every day. One of the easiest and most effective ways to protect the environment is through recycling. Although some people believe it should be a personal choice, I strongly believe that recycling should be mandatory for everyone. This is because it helps reduce pollution, saves natural resources, and raises awareness about environmental responsibility.*

*Firstly, recycling reduces the amount of waste that ends up in landfills and oceans. When people throw away plastic, paper, or glass, these materials take years or even centuries to break down. As a result, landfills grow, and harmful substances pollute the air, soil, and water. Recycling helps decrease this pollution by reusing materials and turning them into new products. For example, recycled paper reduces the need to cut down trees, and recycled plastic helps decrease the amount of plastic waste in the sea.*

*Secondly, recycling helps save important natural resources. Many of the things we use every day come from limited materials such as trees, oil, and metals. By recycling, we can reuse materials instead of using new ones. This means fewer trees are cut, less energy is used, and fewer raw materials are mined from the earth. As a result, we protect nature and help fight climate change. For instance, producing aluminum cans from recycled aluminum uses 95% less energy than making them from raw materials.*

*Lastly, making recycling mandatory would increase awareness about the environment. When people are required to recycle, they begin to think more about the effects of their actions. They may also start making other eco-friendly choices, such as using reusable bags or reducing their waste in general. Governments and schools can support this by offering recycling education and setting up systems to make recycling easy for everyone.*

*In conclusion, recycling should not be an option—it should be a duty. It reduces pollution, saves precious resources, and teaches people to care for the environment. If everyone does their part, we can build a cleaner and healthier world for future generations.*
