BOOKLET A

A - Read the texts and answer the questions (1-25). (25x4=100)

Text 1: The First Lady of Physics

Dr. Chien-Shiung Wu made many important contributions to the field of physics. She is nicknamed "First Lady of Physics". She also (1) ____ many firsts during her lifetime. Wu was born in a small town near Shanghai, China, in 1912. In the early 1900s in China, girls did not typically attend school. Many people believed that it was not necessary for girls to go to school and learn. Wu's father believed that education was important for everyone. He decided to start his own school for girls. This was where Wu began her schooling. In college, Wu studied physics. One of her professors (2) ____ with Marie Curie before, a famous female physicist. Wu graduated at the top of her class in 1934. Then, she moved to the United States and earned her doctorate degree in physics from the University of California, Berkeley, in 1940. After she graduated, she (3) ____ a teaching job at Smith College and later at Princeton University. At the time, Wu was the first female instructor ever to join the faculty at Princeton. In 1944, Wu joined the Manhattan Project, the project which led to the development of the atomic bomb. She was the only Chinese American who contributed to the project. She (4) ____ how to enrich a uranium ore in order to create large quantities of fuel for the bomb. This was a very important step in the project. After World War II, Wu joined the faculty at Columbia University. During the 1950s, she made important contributions to the work of two male colleagues, Tsung-Dao Lee and Chen Ning Yang. Lee and Yang won the Nobel Prize in Physics in 1957, but Wu was not recognized for her work with a Nobel Prize. Aware of the (5) ____ environment that she faced as a woman in the field of physics, Wu encouraged other women (6) ____ in pursuing careers in the sciences. Her passion for physics and perseverance in the face of many obstacles are (7) _____. She is considered a role model for young women (8) _____, showing what heights they can achieve.

Text 2: Pato

Pato is a unique sport, and the national sport of Argentina. Teams of four (9) ____ on horseback to score points with a large leather ball with six handles called a pato. This sport tests players' horseback riding skills and hand-eye coordination. The player with the pato (10) ____ hold it in their right hand and stretch out their arm as they ride. With their other hand, they hold the reins of their horse. Players on the other team try to steal the pato away, often by grabbing and tugging the pato while galloping down the field! Meanwhile, the player with the pato tries to pass it to their teammates. Their goal is to get closer to their opponent's the vertical hoop of at the end of the field. If a player passes the pato through their opponent's hoop, their team scores a point. The team with the most goals (11) ____ the opponent. Historians believe the sport was invented by gauchos in the 17th century in The Pampas, an area in central Argentina with large plains. Gauchos were expert horse riders and hunters who lived in this area. Gauchos played a version of pato in an open field. In the early version,

Gauchos used a duck trapped in a bag. (In fact, pato means “duck” in Spanish.) But by 1822, this version of the sport **(12)** ____ because it was extreme and dangerous. In 1938, some rules were changed, and the duck was replaced with a leather ball. Now, no ducks are used or **(13)** ____ when playing pato. The name of the sport remains the same, though. In 1953, President Juan Perón declared it the national sport of Argentina. Now, pato is a popular and exciting sport for players and **(14)** ____ alike. Every year, Argentina holds the Argentine Pato Open. This championship brings together the top pato teams in the country. Although pato is the national sport of Argentina, very few Argentinians have seen a live game. But pato still remains an important part of Argentine history and culture.

Text 3: The First Mall

The country in the world with perhaps the most malls, and also some of the biggest malls, is the USA. Edina, Minnesota, is the site of the first modern mall. It's still standing, and it's called Southdale Center. This was the first mall to offer a completely enclosed **(15)** ____ shopping experience. Malls up to that point were modelled after the traditional European arcade. An arcade is a semi-covered walkway with shops on both sides. Examples of these arcades **(16)** ____ be found today in Italy and Germany. Southdale Center was actually going to be a new version of the traditional European arcade, surrounded by apartments, schools, and facilities that provide medical and emergency services. But then the plans changed completely. The developer of the shopping center, Dayton Company, and its designer and architect, Victor Gruen, saw a much bigger opportunity. Instead of **(17)** ____ traditional design, they decided that Southdale Center was going to be different; it was going to be inside a big building. It was going to be on more than one level and have a town square in the middle under a skylight. The mall opened in 1956, and it was the first fully enclosed climate-controlled shopping unit space with **(18)** ____ shops. The developing team also wanted to create a place with everything people could possibly need all in one place. From grocery stores, to a postal office, to various department stores—they were all put under one roof. It even ended up including fishponds, trees, a cage with birds, balconies with hanging plants, and a small zoo! Southdale Center **(19)** ____ with a lot of excitement by the American public. On opening day of the mall, 40,000 people came to see it and shop. People came from cities close by, but also from far away, to visit a shopping mall they had never experienced before.
